

IBEx

Technical Training

Bay Microsystems offers comprehensive hands-on technical training to give your network administrators the skills they need to configure and support the day-to-day operation of your IBEx systems. Our staff of highly trained network engineers focuses on practical knowledge, real world experience, and operational techniques to maximize the productivity of your technical personnel.

Bay provides flexible training options at either our Germantown, MD facility or right at your own site with half to full day technical training classes that can be tailored to meet the needs of your specific network deployment. Product training courses are open to current customers and also to customers looking to purchase or awaiting delivery of their systems.

Training Course

This course is designed to qualify network administrators on the installation, setup, and operation of the Bay's IBEx systems. The instructor-led classroom environment allows network administrators to gain invaluable experience through practical hands-on system training that highlights several different network deployment scenarios.

Contacts

For more information and pricing on Bay's IBEx technical training programs or for more details on custom training solutions to suite your needs, please contact your Bay sales representative.
